PROFILE

Builder. Problem solver. Self-directed Software Engineering undergraduate who ships real products, not just coursework. Experienced with full-stack development, AI model integration, and end-to-end application deployment. Currently building LogiSphere AI, a full-stack enterprise logistics platform powered by HuggingFace LLMs. Comfortable working under pressure, learning fast, and taking full ownership of complex technical challenges. Not 9-to-5 minded.

TECHNICAL STACK

AI & LLM: HuggingFace (Kimi-K2-Instruct), LLM API integration, prompt engineering, AI-powered application development, Claude API

Languages: Python, JavaScript, Java, PHP, Dart, HTML/CSS, SQL, Bash (exposure)

Frameworks & Libraries: Flask, Vue.js (Vite), Flutter, Spring Boot (exposure), Leaflet.js

Backend & Databases: Supabase, PostgreSQL, MySQL, REST API design, JWT authentication, role-based access control

DevOps & Tools: Git, GitHub, Render (deployment), Gunicorn, Linux (Ubuntu), remote development environments

WHAT I'VE BUILT

LogiSphere AI | *Vue 3, Flask, Supabase, HuggingFace, Leaflet.js*

- Architected and built a full-stack enterprise logistics platform integrating HuggingFace's Kimi-K2-Instruct LLM for intelligent route optimization and operational decision support.
- Engineered a Vue 3/Vite frontend with real-time map rendering via Leaflet.js, a Flask REST API backend, and Supabase for authentication and persistent storage.
- Submitted web version for a competitive buildathon; simultaneously developing a parallel Flutter mobile version for cross-platform deployment.
- Designed the system architecture from scratch, handling everything from API design and JWT auth to LLM prompt engineering and map integration.

StudyDeck AI | *Flutter, Supabase, HuggingFace Kimi-K2-Instruct*

- Built an AI-powered flashcard application using Flutter and Dart with HuggingFace LLM integration for automated study content generation.
- Implemented MFA, null safety, centralized state management, and security hardening in preparation for Google Play and App Store deployment.
- Managed full deployment pipeline including git history rewriting after a GitHub push protection incident caused by a hardcoded API token.

VLEclone — Virtual Learning Environment | *Vue 3, Flask, MySQL*

- Engineered a full-stack learning management system featuring role-based access control, JWT authentication, forums, assignment submission, grading, and admin reporting.
- Deployed to production on Render via Gunicorn, handling real user load with stable uptime.

SignSee — Sign Language Learning App | *Hackathon Project*

- Conceptualised and shipped a fully functional interactive application solving a real accessibility problem under hackathon time constraints.

SmogGUI — Environmental Data Management System | *Java Swing*

- Designed and delivered a complete desktop GUI application for structured environmental data capture, storage, and import.

EXPERIENCE

Data & Performance Analyst Intern

June – August 2025

Ministry of Culture, Gender, Entertainment and Sport — Strategic Planning & Monitoring Division

- Collaborated with UNICEF Jamaica on data-driven reporting initiatives, building structured documentation systems and translating complex datasets into clear executive briefings.
- Identified operational gaps through data analysis across multiple portfolio areas, delivering actionable insights to senior leadership under real deadlines.
- Managed documentation pipelines and project tracking systems, maintaining accuracy and integrity across institutional records.

Accounting Clerk Intern

July – August 2022

Elarc Welding Products

- Managed financial records with 100% accuracy, demonstrating the precision and reliability required when handling critical business data.

EDUCATION

B.Sc. Software Engineering

Expected November 2027

University of the West Indies, Mona

- Relevant Coursework: Data Structures & Algorithms, Database Systems, OOP, Computer Systems Organisation, Software Engineering, Networking
- Java Skills Certification — HackerRank
- Member, Computing and Society Club — UWI Mona
